Unlimited possibilities.

TVsync makes true audio-video-image content recognition possible on any mobile device. TVsync is powered by the identification technology used by virtually every major content company and publisher to authenticate video and audio assets. Our patented technology enables content owners, publishers, apps developers, and platforms to create unique content consumption experiences in ecommerce, infotainment, and social applications like never before.

Open API.

Are you a developer? TVsync empowers you to build the world's smartest apps with ease. TVsync is supported on iOS and Android for smartphones, tablets, PCs, and smartTVs utilizing Intel, ARM, and MIPS. Plus, we offer an API portal, documentation, support, and tiered service to help you get off the ground right away. Get Started >

Universally accepted.

The trusted choice by virtually every major content company and publisher.
